Journal of Non-Crystalline Solids, 137&138 (1991) vii-xxiv
North-Holland

Contents

Contents Parts I and II vii

PART I

Section 1. The Mott lecture

Photo-induced metastability in amorphous semiconductors
Tanaka, K. 1

Section 2. Hydrogen diffusion and effusion

Hydrogen in crystalline and amorphous silicon
Johnson, N.M. 11

Studies of muon implantation in amorphous and crystalline silicon
Davis, E.A., A. Singh, S.F.J. Cox, S.R. Kreitzman, T.L. Estle, B. Hitti, R.L. Lichti, D. Lamp, R. Duvarney, D.W. Cooke, M. Paciotti and A.C. Wright 17

Dependence of hydrogen trapping densities on hydrogen concentration
Jackson, W.B., C.C. Tsai and P.V. Santos 21

Thermalization in a system with a continuous spectrum of states
Taraskin, S. 25

Deuterium diffusion in a-Si:H studied with elastic recoil detection
Van den Boogaard, M.J., W.M.A. Bik, F.H.P.M. Habraken and W.F. van der Weg 29

Light-induced hydrogen diffusion in a-Si:H
Santos, P.V., C. Doland, N.M. Johnson and R.A. Street 33

Hydrogen diffusion in the a-Si:Ge alloy system
Beyer, W., H.C. Weller and U. Zastrow 37

Hydrogen diffusion in rf-sputtered a-Ge:H thin films
Graeff, C.F. de O., F.L. Freire Jr. and I. Chambouleyron 41

Novel kinetic electron-related model for hydrogen desorption from a-Si:H
Khait, Yu.L., R. Weil, R. Beserman, W. Beyer and H. Wagner 45

Infrared spectroscopy during hydrogen effusion of a-Si:H, a-SiGe:H and a-Ge:H
Heintze, M., K. Eberhardt, O. Tress and G.H. Bauer 49

Explosive isothermal hydrogen exodiffusion in VHF-GD a-Si:H thick layers
Bustarret, E., M.S. Brandt, M. Stutzmann and M. Favre 53

The correlation between hydrogen content and electronic properties in a–Si:H
Yamaguchi, M. and K. Morigaki 57

Failure phenomena due to hydrogen migration in amorphous a-SiN_x:H films
Roizin, Y. 61

0022-3093/91/$03.50 © 1991 – Elsevier Science Publishers B.V. All rights reserved

Section 3. Structure

The structure of a-Si:H by small angle X-ray scattering
Mahan, A.H., Y. Chen, D.L. Williamson and G.D. Mooney 65

Connection between photovoltaic quality and the structure of deuterated amorphous Si and Ge films
Norberg, R.E., P.A. Fedders, J. Bodart, R. Corey, W. Paul, W.A. Turner and S.J. Jones 71

Structural study of a-$Si_{1-x}C_x$:H by EXAFS and X-ray scattering
Meneghini, C., S. Pascarelli, F. Boscherini, S. Mobilio and F. Evangelisti 75

Amorphous hydrogenated silicon inhomogeneities as revealed by scanning with mercury and laser probes
Andrianova, E., J. Gerditskaya, Y. Roizin and V. Sviridov 79

Stress measurement of glow discharge produced a-Ge:H thin films and its relation to electronic and structural properties
Wickboldt, P., F. Marques, S.J. Jones, D. Pang, W.A. Turner and W. Paul 83

Investigation on structural changes in amorphous tetrahedral alloys by means of differential scanning calorimetry
Battezzati, L., F. Demichelis, C.F. Pirri, A. Tagliaferro and E. Tresso 87

Structural instability of Si-nanocrystals in a $(SiH_2)_n$ matrix
Kozlowski, F., V. Petrova-Koch, A. Kux, W. Stadler, A. Fleischmann and H. Sigmund 91

Influence of hydrogen on the evolution of structural properties of amorphous silicon carbide
DellaMea, G., F. Demichelis, C.F. Pirri, P. Rava, V. Rigato, T. Stapinski and E. Treso 95

Structural order in amorphous silicon and its alloys: Raman spectra and optical gap
Sokolov, A.P., A.P. Shebanin, O.A. Golikova and M.M. Mezdrogina 99

'Boson' peak in Raman spectra of hydrogenated amorphous silicon
Ivanda, M., K. Furić, O. Gamulin and D. Gracin 103

Structural properties of Li-doped hydrogenated amorphous silicon
Pierz, K., M. Stutzmann, S. Zollner, W. Beyer and C. Brillerty 107

Lithium stability in hydrogenated amorphous silicon
Beyer, W., J. Herion and U. Zastrow 111

Effect of local structural order on the doping in hydrogenated amorphous silicon (a-Si:H)
Dusane, R.O., S.R. Dusane, V.G. Bhide and S.T. Kshirsagar 115

Chemical induction effects: O-incorporation in, and substitution doping of a-Si:H
Lucovsky, G., Z. Jing and J.L. Whitten 119

The structure of the glassy Ge–Sb–S system and its connection with the MRO structures of GeS_2 and Sb_2S_3
Červinki, L., O. Smotlacha, J. Bergerová and L. Tichý 123

Intermediate range order – a differential anomalous X-ray scattering study in a-As_2S_3
Zhou, W., D.E. Sayers, M.A. Paesler and D. Raoux 127

Structural study of coordination defects in amorphous GaAs by a combination of EXAFS and X-ray anomalous scattering experiments
Udron, D., M.-L. Thèye, D. Raoux, A.-M. Flank, P. Lagarde and J.-P. Gaspard 131

Section 4. Molecular dynamics

Ab-initio molecular dynamics simulations of amorphous silicon
Yonezawa, F., S. Sakamoto and M. Hori 135

Defects, tight binding, and ab initio molecular dynamics simulations on a-Si
Fedders, P.A. 141

Large picosecond energy fluctuations of single atoms in a-Si revealed by molecular dynamics
Khait, Yu.L., A. Silverman, R. Weil and J. Adler 145

The electronic properties of amorphous semiconductors
Morgan, G.J., J.N. Burr, N.A. Bruce, B.J. Hickey and J.M. Holender 149

Structural properties of amorphous SiC via ab-initio molecular dynamics
Finocchi, F., G. Galli, M. Parrinello and C.M. Bertoni 153

Section 5. Equilibration

Defect pool model of defect formation in a-Si:H
Winer, K. 157

Structural equilibration in intrinsic, single-doped and compensated TFTs – experiments and calculations
Krötz, G. and G. Müller 163

An investigation of the phosphorous doping mechanism in a-Si by sweep-out experiments
Liu, E.Z. and W.E. Spear 167

Absence of thermal quenching effects in undoped amorphous silicon deposited by the PECVD of He-diluted silane
Meaudre, R., M. Meaudre, P. Roca i Cabarrocas, S. Tanidi, Y. Bouizem and M.-L. Theye 171

An evidence of solid-phase chemical equilibration of donor concentration in a-Si:H
Okushi, H., N. Orita, K. Arai and K. Tanaka 175

A-Si:H structure relaxation and boron reactivation
Wu, Z.Y. and B. Equer 179

The nature of structural defects and thermal equilibrium effects on doped a-Si:H as elucidated by electron nuclear double resonance measurements
Yokomichi, H. and K. Morigaki 183

Thermally induced changes of conductivity in undoped and doped amorphous germanium
Eberhardt, K., M. Heintze and G.H. Bauer 187

On equilibration processes in GD amorphous silicon, prepared at high substrate temperatures
Vaněček, M., B.P. Nelson, A.H. Mahan and R.S. Crandall 191

Equilibration temperature of a-Si:H and a-Ge:H from Raman measurements
Schubert, M.B., H.-D. Mohring, R. Zedlitz and G.H. Bauer 195

Thermal equilibrium behavior of defect density and conductivity in a-$Si_{1-x}Ge_x$:H alloys
Yan, H., A. Morimoto, M. Kumeda and T. Shimizu 199

Section 6. Metastable defects

A weak bond/dangling bond conversion model for light-induced defects in a-Si:H
Santos, P.V. and W.B. Jackson 203

Charge-defect equilibrium description of metastable defect concentrations
Fortmann, C.M., R.M. Dawson and C.R. Wronski 207

Kinetics of light-induced defect creation in amorphous silicon: the constant degradation method
Brandt, M.S. and M. Stutzmann 211

Defects in amorphous silicon – extrinsic or intrinsic?
Redfield, D. and R.H. Bube 215

Theoretical study on photo-structural change of a weak bond in tetrahedrally bonded amorphous semiconductors
Shinozuka, Y. and Y. Ishihara 219

The saturation of light-induced defects in hydrogenated amorphous silicon
Isomura, M., N. Hata and S. Wagner 223

Light induced defects in a-Si:H: saturation or equilibrium?
Wu, Z.Y., J.M. Siefert and B. Equer 227

Accelerated metastable defect creation in a-Si:H by short light pulses
Stutzmann, M., J. Nunnenkamp, M.S. Brandt, A. Asano and M.C. Rossi 231

Stability of a-Si:H deposited at high temperatures and hydrogen dilution in a remote hydrogen plasma reactor
Johnson, N.M., P.V. Santos, C.E. Nebel, W.B. Jackson, R.A. Street, K.S. Stevens and J. Walker . . 235

Structural relaxation of a-Si:H after photon, electron beam and thermal treatment: comparison and discussion of recent models
Könenkamp, R. and E. Wild 239

Evidence for the dominance of charged dangling bond defects in the photodegradation of hydrogenated amorphous silicon
McElheny, P.J., H. Okushi, S. Yamasaki and A. Matsuda 243

The role of hydrogen clusters in the Staebler–Wronski effect of amorphous silicon as elucidated by optically detected electron nuclear double resonance
Kondo, M. and K. Morigaki 247

Study of metastable states in the gap of doped a-Si:H by photomodulation spectroscopy
Chen, L., J. Tauc, J. Kočka and J. Stuchlík 251

Spin-dependent transport and recombination in a-Si:H
Lips, K. and W. Fuhs 255

Interpretation of the saturation behaviour of the metastable defect density created in intrinsic a-Si:H by keV-electron irradiation
Scholz, S. and B. Schröder 259

Saturation and recovery kinetics of current-induced defects in a-Si:H
Street, R.A. and M. Hack 263

Light induced metastable defects in a-Si:H studied by transient space charge perturbed currents
Han, D., K. Wang and M. Silver 267

Transient photoconductivity studies of the UV light soaked state of amorphous organic polysilanes
Naito, H., M. Amatsu and M. Okuda 271

Optically detected magnetic resonance measurements for amorphous silicon treated by hydrostatic pressure at 5 GPa
Kondo, M., W. Utsumi, T. Yagi and K. Morigaki 275

Metastable photo-induced changes in compensated a-Si:H films
Rath, J.K., W. Fuhs and H. Mell 279

Persistent photoconductivity decay mechanism in compensated amorphous silicon
Hyun, K.-S., J. Jang and C. Lee 283

Metastable defect states and equilibration temperatures in a-SiN_x:H, a-SiO_x:H and a-SiC_x:H
Hamed, A., H. Fritzsche, X.-M. Deng, S. Köhler and R. Gupta 287

Microscopic origin of the light-induced defects in hydrogenated nitrogen-rich amorphous silicon nitride films
Kanicki, J., W.L. Warren, C.H. Seager, M.S. Crowder and P.M. Lenahan 291

Section 7. Density of states: deep defects and band tails

Weak bonds and atomic charge distribution in hydrogenated amorphous silicon
Kugler, S. and G. Náray-Szabó 295

Application of nested CPA theory to hydrogenated amorphous silicon
Avendaño, J., F.L. Castillo Alvarado and R.A. Barrio 299

Energetics and structure of dangling and floating bonds in amorphous silicon
Zdetsis, A. and G. Froudakis 303

Effect of the local disorder in a-Si on the electronic density of states near the band edges
Davidson, B.N., G. Lucovsky and J. Bernholc 307

Density of states spectroscopy in p-type a-Si:H and a-SiC:H
Crandall, R.S., S.J. Salamon and Y. Xu 311

Equilibrium and non-equilibrium gap state distribution in a-Si:H
Schumm, G. and G.H. Bauer 315

Observation of configuration switching of the D center in a-Si:H
Leen, T.M. and J.D. Cohen 319

Spin equilibration in hydrogen depleted amorphous silicon
Zafar, S. and E.A. Schiff 323

Near-surface defects in amorphous semiconductors related to hydrogen incorporation
Jin, S., S. Aljishi and L. Ley 327

Hydrogenation induced changes in band states in a-Si:H
Feng, G.J., M. Katiyar, J.R. Abelson and N. Maley 331

Nature of deep defects in bulk VHF-GD a-Si:H
Favre, M., A. Shah, J. Hubin, E. Bustarret, M.A. Hachicha and S. Basrour 335

Surface and bulk density of states of a-Si:H determined by CPM and total-yield photoelectron spectroscopy
Siebke, F., W. Beyer, J. Herion and H. Wagner 339

Evaluation of the constant photocurrent method for determining the energy distribution of localised states in disordered semiconductors
Marshall, J.M., W. Pickin, A.R. Hepburn, C. Main and R. Brüggemann 343

How to reach more precise interpretation of subgap absorption spectra in terms of deep defect density in a-Si:H
Wyrsch, N., F. Finger, T.J. McMahon and M. Vanecek 347

Photoconductivity and $\mu\tau$-products in a-Si:H – compatibility with various defect models
Schumm, G., C.-D. Abel and G.H. Bauer 351

Further study of the determination of the density of gap states by thermally stimulated conductivity
Zhu, M., M.B. von der Linden, J. Bezemer, R.E.I. Schropp and W.F. van der Weg 355

Simulation of modulated photoconductivity in sandwich configuration
Brüggemann, R., G. Schumm, C. Main, J. Berkin and G.H. Bauer 359

Gap-states and their capture-cross-section distribution in a-Si:H studied by frequency-resolved photocurrent spectroscopy
Hattori, K., Y. Niwano, H. Okamoto and Y. Hamakawa 363

True position of dangling bonds in the gap of undoped hydrogenated amorphous silicon
Lee, C., W.A. Turner and W. Paul 367

The effect of structure on the electronic properties of a-Si:H
Kosarev, A.I., A.G. Kovrov, R.A.G. Gibson, P.G. LeComber, T.A. Sidorova and A.J. Vinogradov 371

Investigation of a-Si:H thin films using the constant photocurrent method
Kurnia, D., R.P. Barclay and J.M. Boud 375

Electronic levels of phosphorus donors in a-Si:H
Kočka, J., J. Stuchlík, M. Stutzmann, L. Chen and J. Tauc 379

ESR splitting induced by ion implanted fluorine in amorphous silicon
Peng, S., J. Liu, N. Ke, P. Li and S.P. Wong 383

Defects and disorder broadened band tails in compensated hydrogenated amorphous silicon
Aljishi, S., S. Jin and L. Ley 387

Influence of N, O and C impurities in a-Si:H
Shimizu, T., M. Matsumoto, M. Yoshita, M. Iwami, A. Morimoto and M. Kumeda 391

Section 8. Transport

Transport in a-Si:H
Nebel, C.E. 395

Properties of free-carrier transport in a-Se and a-Si:H
Juška, G. 401

High-field electron drift in a-Si:H
Antoniadis, H., R.I. Devlen, S. Esipov, S. Guha, E.A. Schiff and J. Tauc 407

Field dependence of the low temperature quantum efficiency, mobility and ($\mu\tau$)-product in a-Si:H
Juška, G., K. Arlauskas, O. Klíma and J. Kočka 411

High-field and low-field transport in amorphous semiconductors
Cleve, B., B. Movaghar, R. Schumacher and P. Thomas 415

Scaling of the photo-induced frequency dependent loss in amorphous silicon at low temperatures
Long, A.R., M. Mostefa and R. Lemon 419

Microscopic derivation of multiple-trapping equations for amorphous semiconductors
Voirol, V. and H. Beck 423

SCLC transients in a-Si:H – new features and possibilities
Kočka, J., O. Klíma, G. Juška, M. Hoheisel and R. Plättner 427

Depth profiles of mobility lifetime products and capture cross-sections in a-Si:H
Wyrsch, N. and A. Shah 431

Unraveling the $\mu\tau$-mystery in a-Si:H
Antoniadis, H. and E.A. Schiff 435

Excess carrier dispersion in conventionally dispersive amorphous semiconductors and the mobility–lifetime anomaly in a-Si:H
Main, C., J. Berkin, R. Brüggemann and J.M. Marshall 439

On the carrier transport mechanism in post-transit TOF experiments
Nesladek, M., G.J. Adriaenssens and A.S. Volkov 443

Study of the density of states of hydrogenated amorphous silicon from time-of-flight and modulated photocurrent experiments
Kleider, J.P., C. Longeaud and O. Glodt 447

Simulated time-of-flight experiments across abrupt and graded shifts in a band edge
Shapiro, F.R. 451

Determination of electron and hole mobilities in a-Si:H from photo-electric effects in a waveguide structure
Zelikson, M., K. Weiser, J. Salzman and J. Kanicki 455

A new result in transient current experiment on a-Si:H p/i/n and n/i/n devices
Zhang, Q., X. Liao, C. Hsia, G. Kong and D. Zhang 459

Transient photocurrent regimes in hydrogenated amorphous silicon films under weak, square pulse illumination
Tzanetakis, P., H. Mell and W. Fuhs 463

The sign of photocarriers and thermal quenching of photoconductivity in a-Si:H
Fritzsche, H., M.Q. Tran, B.-G. Yoon and D.-Z. Chi 467

Thermoelectric power under illumination
Goesman, F. and D.I. Jones 471

Effects of dangling bond charge on ambipolar transport measurements in a-Si:H
Sauvain, E., A. Shah, J. Hubin and P. Pipoz 475

a-Si:H ambipolar diffusion length and effective lifetime measured by flying spot (FST) and spectral photovoltage (SPT) techniques
Vieira, M., R. Martins, E. Fortunato, F. Soares and L. Guimarães 479

Non-steady state photo-EMF induced by the dynamic grating technique in a-Si:H films
Trofimov, G.S., A.I. Kosarev, A.G. Kovrov and P.G. LeComber 483

Transient microwave detected photoconductivity as a tool for in-situ evaluation of intrinsic a-Si:H films deposited and annealed at different temperatures
Neitzert, H.C., W. Hirsch, C. Swiatkowski, S. Schroetter and M. Kunst 487

Numerical simulation of the effect of surface defects on the photoconductivity of N-doped a-Si:H
Fornarini, L., A. Mittiga, M. Sebastiani and P. Fiorini 491

Noise characterisation studies of amorphous semiconductors
Barclay, R.P. and J.M. Boud 495

Quantised electron effects in metal/a-Si:H/metal thin film structures
Hajto, J., M.J. Rose, A.J. Snell, I.S. Osborne, A.E. Owen and P.G. LeComber 499

Carrier transport in a hopping system with energetic disorder
Arkhipov, V.I., H. Bässler and A.I. Rudenko 503

Calculation of the effective conductivity of μc-Si:H using three-phase model
Liu, J., B. Yan, L. Shi, X. Geng, Z. Sun and W. Xu 507

Transient and steady-state optoelectronic properties of μc-Si:H
Wang, F., H.N. Liu, Y.L. He, A. Schweiger and R. Schwarz 511

Hopping conductivity due to bipolarons in amorphous silicon nitride films
Roizin, Y. and L. Tsibeskov 515

Temperature dependence of the resistivity of amorphous indium oxide
Bellingham, J.R., M. Graham, C.J. Adkins and W.A. Phillips 519

Current fluctuations in thin a-Si:H films
Ihn, Th., A.K. Savchenko, M.E. Raikh and R. Schwarz 523

Section 9. Fast phenomena

Femtosecond thermalization processes in a-Si:H
Hulin, D., A. Mourchid, P.M. Fauchet, W.L. Nighan Jr. and R. Vanderhaghen 527

Femtosecond studies of photoinduced bleaching and hot carrier dynamics in a-Si:H and a-Ge:H
Wraback, M., J. Tauc, D. Pang, W. Paul, J.-K. Lee and E.A. Schiff 531

The role of dangling bond states in the picosecond recovery of photoinduced absorption in a-Si:H
Esser, A., H. Heesel, H. Kurz, C. Wang, M.J. Williams and G. Lucovsky 535

Effect of light degradation on nanosecond photoluminescence decay in a-Si:H
Gangopadhyay, S., C. Palsule and W. Borst 539

The mechanism of subnanosecond carrier recombination in a-Si:H
Vanderhaghen, R., A. Mourchid, D. Hulin, D.A. Young, W.L. Nighan Jr. and P.M. Fauchet 543

Transient photoconductivity in amorphous $S_{1-x}C_x$:H
Pohlmann, A., R. Fischer, R. Brüggemann, W. Stolz and E.O. Göbel 547

Section 10. Recombination

Geminate recombination in a-Si:H
Stachowitz, R., M. Bort, R. Carius, W. Fuhs and S. Liedtke 551

Lifetime distribution in a-Si:H: geminate-, nongeminate- and Auger-processes
Ambros, S., R. Carius and H. Wagner 555

Luminescence lifetime distribution in amorphous semiconductors
Levin, E.I., S. Marianer, B.I. Shklovskii and H. Fritzsche 559

Unification of geminate and distant pair recombination statistics: low temperature photoelectronic properties in a-Si:H
Ristein, J. 563

Influence of nonradiative and nongeminate processes on a lifetime distribution of photoexcited carriers in amorphous semiconductors at low temperatures
Baranovskii, S.D., R. Saleh, P. Thomas, H. Vaupel and H. Fritzsche 567

Recombination of electron–hole pairs at low temperatures
Searle, T.M. 571

Transient luminescence in amorphous silicon
Pickin, W. and J.M. Marshall 575

Monte-Carlo simulations of carrier relaxation and recombination in a-Si:H
Gutschker, O. and R. Bindemann 579

Optically detected magnetic resonance (ODMR) in a-Si:H
Liedtke, S. and W. Fuhs 583

Luminescence by IR-stimulation of metastable carriers in a-Si:H: experiment and Monte-Carlo simulation
Vollmar, H.-P. and R. Bindeman 587

Subband optical excitation and recombination in a-Si:H
Gu, S.Q., P.C. Taylor and J. Ristein 591

Electroluminescence in a-Si:H p–i–n junctions
Carius, R. and F. Becker 595

Electroluminescence: a study of non-geminate radiative and non-radiative bulk recombination
Wang, K., D. Han, M. Kemp and M. Silver 599

The nature of photoconductivity decay spectral dependence in a-Si:H
Koughia, C.V. and E.I. Terukov 603

The effect of the energy dependence of capture coefficients on recombination characteristics of amorphous semiconductors
Belyaev, A.D. and I.P. Zvyagin 607

Dual beam modulated photoconductivity: a kinetic analysis
Gauthier, M. 611

Section 11. Optical properties

Systematic study of the influence of contacts on CPM results
Hoheisel, M., O. Štika and J. Kočka 615

Inhomogeneity of amorphous silicon thin films from optical transmission and reflection measurements
Pisarkiewicz, T., T. Stapinski, H. Czternastek and P. Rava 619

Depth profiling of defects in a-Si:H by photothermal deflection spectroscopy
Asano, A. and M. Stutzmann 623

A theoretical consideration on the electroabsorption spectra of amorphous semiconductors
Okamoto, H., K. Hattori and Y. Hamakawa 627

The study of optical nonlinearity in amorphous Si-based alloys
Chen, K., J. Xu, X. Huang, Z. Li and H. Fritzsche 631

Crystalline–amorphous contrast formation in thermally crystallized SiC
Ruttensperger, B., G. Krötz, G. Müller, G. Derst and S. Kalbitzer 635

Author index Parts I and II xxvii

Subject index Parts I and II xlvii

PART II

Contents Parts I and II vii

Section 12. Deposition and growth

Plasma and surface reaction during a-Si:H film growth
Perrin, J. 639

Model for the growth of plasma deposited a-Si:H and related materials
Street, R.A. 645

Kinetic model of silicon–hydrogen network formation
Koynov, S. 649

Structural relaxation on growing surface during network formation of a-Si:H
Shirai, H., K.-j. Nakamura, J. Hanna and I. Shimizu 653

Deposition of device quality, low H content a-Si:H by the hot wire technique
Mahan, A.H., B.P. Nelson, S.J. Salamon and R.S. Crandall 657

Investigation of the precursors of a-Si:H films produced by decomposition of silane on hot tungsten surfaces
Horbach, C., W. Beyer and H. Wagner 661

A new, laminar flow photo-CVD method for preparing hydrogenated amorphous silicon films
Furukawa, A., Y. Iida, T. Yamaguchi, N. Harada, H. Nozaki, T. Kamimura, K. Yano, H. Ito and K. Okumura 665

Role of ions in formation of amorphous Si:H network in electron cyclotron resonance plasma chemical vapor deposition
Nakayama, Y., K. Hitsuishi, M. Zhang, H. Imamura and T. Kawamura 669

Low temperature growth of epitaxial and amorphous silicon in a hydrogen-diluted silane plasma
Tsai, C.C., G.B. Anderson and R. Thompson 673

High quality a-Si:H films and interfaces prepared by VHF plasma CVD
Oda, S. and M. Yasukawa 677

Deposition of phosphorus doped microscrystalline silicon below 70°C at 70 MHz
Prasad, K., F. Finger, S. Dubail, A. Shah and M.B. Schubert 681

Influence of UV irradiation on a-Si:H film growth
Koynov, S., A. Toneva and K. Kougia 685

Properties of a-$Si_{1-x}C_x$:H alloys as deposited in the hot-plasma-box glow discharge reactor
Bhusari, D.M., R.O. Dusane and S.T. Kshirsagar 689

Stability and hole-transport in a-Si:H prepared by 'chemical annealing'
Shirai, H., T. Ariyoshi, J. Hanna and I. Shimizu 693

p-and n-type doping in spontaneous chemical deposition
Kawamura, C., I. Shimizu and J. Hanna 697

Environmentally nonpolluting boron doping of a-$Si_{1-x}C_x$:H with liquid boron source
Suchaneck, G., M. Albert, W. Beyer, H. Stötzel and K. Schade 701

Low hydrogen content a-Si:H produced by layer by layer deposition technique
Lim, Y.-J., J. Jang and C. Lee 705

Growth of a-Si:H and related alloys using liquid organic sources
Gaughan, K., S. Hershgold, J.M. Viner and P.C. Taylor 709

A new deposition mode in plasma-enhanced cryogenic CVD
Shin, H., S. Miyazaki and M. Hirose 713

A unified relationship among the opto-electric properties of a-Si:H and approaches for further improvement
Hishikawa, Y., S. Tsuge, N. Nakamura, K. Wakizaka, S. Kouzuma, S. Tsuda, S. Nakano, Y. Kishi and Y. Kuwano 717

Silicon film formation by hydrogen reactions
Roth, A. and F.J. Comes 721

A study on excimer laser amorphous silicon film crystallization
Bianconi, M., F.J. Fonseca, C. Summonte and G. Fortunato 725

Crystallization of a-Si:H with cw and pulsed lasers
Fauchet, P.M. and I.H. Campbell 729

Temperature dependence of the crystallite size and crystalline fraction of microcrystalline silicon deposited from silane by plasma CVD
Vepřek, S., F.-A. Sarott and M. Rückschloss 733

Photoconductivity and optical stability of intrinsic μc-Si films formed by remote plasma-enhanced chemical-vapor deposition, RPECVD
Williams, M.J., C. Wang and G. Lucovsky 737

Deposition and characterization of amorphous and microcrystalline Si, C alloy thin films by a remote plasma-enhanced chemical-vapor deposition process – RPECVD
Wang, C., G. Lucovsky and R.J. Nemanich 741

A novel plasma jet for GeH_x-radical generation and a-Ge:H film deposition
Kessler, F., H.-D. Mohring and G.H. Bauer 745

Effects of atomic hydrogen injection on ECR plasma deposition of a-Ge:H
Aoki, T., Y. Nishikawa, H. Ii and M. Hirose 749

Deposition of silicon–germanium alloys under plasma modulation conditions
Bruno, G., P. Capezzuto, M. Losurdo, P. Manodoro and G. Cicala 753

Engineering of plasma deposition systems used for producing large area a-Si:H devices
Martins, R., I. Ferreira, N. Carvalho and L. Guimarães 757

Cross contamination due to dopants in single chamber deposition systems
Uğur, H., S. Varol, S. Uğur and I. Karabay 761

Section 13. In situ characterization

In situ characterization of the growing a-Si:H surface by IR spectroscopy
Toyoshima, Y., K. Arai, A. Matsuda and K. Tanaka 765

In situ study of the hydrogen rich overlayer at the a-Si:H surface by infrared ellipsometry
Blayo, N. and B. Drevillon 771

Infrared ellipsometry study of the vibrational properties of growing microcrystalline silicon thin films
Blayo, N. and B. Drevillon 775

Challenges and confusions in the kinetics and mechanism of plasma induced deposition of a- and μc-Ge:H
Vepřek, S., F. Glatz and R. Konwitschny 779

Energetic particle fluxes in magnetron sputter deposition of a-Si:H
Myers, A.M., J.R. Doyle, G.J. Feng, N. Maley, D.L. Ruzic and J.R. Abelson 783

Real time spectroscopic ellipsometry determination of the evolution of amorphous semiconductor optical functions, bandgap and microstructure
Li, Y.M., I. An, H.V. Nguyen, C.R. Wronski and R.W. Collins 787

In situ investigation of the growth of microcrystalline silicon obtained by alternating deposition and hydrogen-etching sequences
Fang, M., J.B. Chevrier and B. Drevillon 791

The formation and stability of sub-micron clusters in silane and argon plasmas
Hundhausen, M. and L. Ley 795

Properties of GeH_4 (SiH_4) plasmas for deposition of device-quality a-Ge:H (a-Si:H) material
Kasper, W., R. Plättner and G. Eichmeier 799

Section 14. Amorphous germanium (a-Ge:H) and SiGe alloys

Structural, optical and photoelectronic properties of improved PECVD a-Ge:H
Paul, W. 803

Density of states and carrier dynamics in amorphous silicon germanium alloys and amorphous germanium
Unold, Th., J.D. Cohen and C.M. Fortmann 809

Electron and hole $\mu\tau$ products of slightly doped a-Ge:H films
Kusian, W., H. Pfleiderer and E. Günzel 813

Electrical and optical properties of a-Si:H, a-SiGe:H and a-SiSn:H deposited by magnetron assisted silane decomposition
Marakhonov, V., N. Rogachev, J. Ishkalov, J. Marakhonov, E.I. Terukov and V. Chelnokov 817

The role of nitrogen in sputtered a-Si:H, a-Ge:H and a-$Si_{56}Ge_{44}$:N:H
Drüsedau, T. 821

Section 15. Amorphous carbon (a-C:H) and SiC alloys

Preparation and properties of amorphous carbon
Robertson, J. 825

Self-doping and hopping conductivity in amorphous carbon
László, I. and S. Kugler 831

Photoinduced effects in diamondlike hydrogenated amorphous carbon films
Koropecki, R.R., L.R. Tessler, J.A. Sanjurjo and F. Alvarez 835

A new method for evaluation of sp3/sp2 ratio in diamond-like films from optical measurements
Demichelis, F., C.F. Pirri and A. Tagliaferro 839

Electrical and optical properties of plasma-deposited amorphous hydrocarbon films
Rohwer, K., P. Hammer, J.-U. Thiele, W. Gissler, P. Blaudeck, Th. Frauenheim and D. Meissner 843

Characterization of high electronic quality a-SiC:H films by $\mu\tau$ products for electrons and holes
Mohring, H.-D., C.-D. Abel, R. Brüggemann and G.H. Bauer 847

Nature of valence states of a-$Si_{1-x}C_x$:H alloys in the low carbon concentration limit
De Seta, M., S.L. Wang, P. Narducci and F. Evangelisti 851

Distribution of electronic gap states in a-Si:C:H with low carbon content
Herremans, H., Ö. Öktü, W. Grevendonk and G.J. Adriaenssens 855

Picosecond time-resolved photoluminescence characterization of a-SiC:H films prepared by electron cyclotron resonance plasma
Gangopadhyay, S., M. Pleil, W. Borst, C. Young and M. Kristiansen 859

The incorporation of carbon in a-Si:H enhanced by boron doping
Wu, Z.Y., B. Drevillon, M. Fang, A. Gheorghiu and C. Senemaud 863

Distribution of occupied states in a-C:H and a-$Si_{1-x}C_x$:H alloys as determined by total yield spectroscopy
De Seta, M., P. Fiorini, F. Coppola and F. Evangelisti 867

Free energy model for bonding in a-Si alloys
Smith, F.W. and Z. Yin 871

Band structure model of Ge–C alloy films prepared from tetraethylgermanium in a rf discharge
Tyczkowski, J., E. Odrobina, M. Gazicki and F. Olcaytug 875

Section 16. Amorphous silicon–nitrogen alloys

Studies of the deposition of high quality N-rich amorphous silicon nitride films
Yin, Z. and F.W. Smith 879

Atomic microstructure and electronic properties of a-SiN_x:H deposited by PECVD
Maeda, K. and I. Umezu 883

ESR in silicon nitride films prepared using nitrogen isotope
Kumeda, M., N. Awaki, H. Yan, A. Morimoto and T. Shimizu 887

Theoretical study of a-SiN_xH_y alloys
Ordejón, P. and F. Ynduráin 891

Optical and electrical properties of a-Si_xN_y:H films prepared by rf plasma using N_2+SiH_4 gas mixtures
Bertran, E., J.M. López-Villegas, J.L. Andújar, J. Campmany, A. Canillas and J.R. Morante . . . 895

Determination of the ordering in amorphous silicon alloys from Penn gap energies
Bayliss, S.C., S.J. Gurman, R. Asal and D. Hall 899

Section 17. Miscellaneous materials

Partial densities of states and chemical shifts in the system a-SiO_x:H ($0 \leq x \leq 2.2$)
Simunek, A. and G. Wiech 903

Structure and transport properties of amorphous Sn_xSi_{1-x} alloys ($0 \leq x \leq 1$) prepared by evaporation under an atomic hydrogen flow
Vergnat, M., G. Marchal and Ph. Mangin 907

Structural and electronic properties of ternary hydrogenated amorphous silicon–sulfur–selenium alloys
Hammam, M., S.M. Al-Alawi, B. Al-Alawi, S. Al-Dallal, S. Aljishi and M. Stutzmann 911

Reversible photoinduced changes of optical and electronic transport properties in organopolysilanes
Shimakawa, K., K. Ishida, S. Asokan and O. Imagawa 915

Optical absorption edge and photoluminescence spectra in amorphous and crystalline boron-rich solids
Kimura, K., T. Tada, A. Hori and A. Furukawa 919

Optical absorption of a-B and a-$B_{1-x}Si_x$ films prepared by LPCVD method
Ong, C.W., K.P. Chik and H.K. Wong 923

The origin of extended states in conducting polymers
Philips, P. and J.-L. Wu 927

Semiconductor-to-metal transitions induced by pressure in the amorphous alloy system a-$Si_{1-y}Ni_y$:H
Asal, R., S.C. Bayliss and E.A. Davis 931

Doping for making n- and p-type a-GaP:H films during reactive evaporation and sputtering
Fujiyoshi, T., M. Onuki, K. Honmyo, H. Kubota and T. Matsumoto 935

Section 18. Electronic properties of chalcogenides

Theory of negative-U 'effects' in amorphous (glassy) semiconductors
Klinger, M. 939

Charge carrier trapping in chalcogenide semiconductors
Polischuk, B., S.O. Kasap, V. Aiyah, D. Scansen and A. Bekirov 943

Transient hole transport behavior of amorphous arsenic triselenide near its glass transition temperature
Naito, H., T. Iwai, T. Matsushita and M. Okuda 947

Modulated and transient photoconductivity in a-As_2Se_3
Main, C., C.P. Webb, R. Brüggemann and S. Reynolds 951

Gap-state distribution in $Ge_{25}Se_{75-x}Bi_x$ sputtered films by phase shift
Kounavis, P. and E. Mytilineou 955

Photoluminescence in $Ge_xAs_ySi_{1-x-y}$ glasses by varying the average coordination number
Mitsa, V., Y. Babinets, Y. Gvardioniv and I. Yermolovich 959

Studies of evaporated amorphous $GeSe_2$ films as a function of annealing
Theye, M.-L., M.F. Kotkata, K.M. Kandil, A. Gheorghiu, C. Senemaud, J. Dixmier and F. Pradal 963

Section 19. Photostructural changes in chalcogenides

Modelling the structure and photostructural changes in amorphous arsenic sulfide
Paesler, M.A. and G. Pfeiffer 967

Non-Archimedean model for the relaxation process of the photoinduced darkening in amorphous chalcogenide films
Popescu, M., A. Andriesh, V. Chumash, N. Enachi, I. Cojocaru and A. Grozescu 973

Comparative studies of pressure and photo induced structural changes in As_2S_3 glass
Hamanaka, H., S. Minomura and K. Tsuji 977

On the kinetics of the reorientation of light-induced anisotropy in a-$GeSe_2$ films
Kósa, T. and I. Jánossy 981

Light-induced ESR and disappearance of photodarkening in amorphous Ge–S films alloyed with lead
Masuda, A., M. Kumeda, A. Morimoto and T. Shimizu 985

On the nature of structural relaxation in amorphous As_2S_3
Jacobsen, H., M. Förderer, J. Bischof, G. Kasper and S. Hunklinger 989

Intrinsic and photoinduced elliptical dichroism and birefringence in glassy semiconductors
Lyubin, V.M. and V.K. Tikhomirov 993

Optically induced metastable defects in a-As_2S_3
Tada, T. and T. Ninomiya 997

Plasma deposition of amorphous As–S films
Nagels, P., R. Callaerts, M. van Roy and M. Vlček 1001

Dynamical aspects of laser-induced phase transformations in amorphous GeTe
Nakayoshi, Y., Y. Kanemitsu and Y. Masumoto 1005

Evidence for a non-thermal mechanism of order–disorder transformations in optical recording thin films
Situ, H., Y.W. Lu and A.-L. Jung 1009

Photothermal recording in thin films of Se–Te–Ag glasses
Mitkova, M., E. Vateva and E. Skordeva 1013

Photoinduced defects in amorphous chalcogenides: similarity and dissimilarity to the Staebler–Wronski effect
Shimakawa, K., S. Inami and S.R. Elliott 1017

Section 20. Doping and photodoping in chalcogenides

Physics and applications of photodoping in chalcogenide glasses
Tanaka, K. 1021

Lateral diffusion of silver in vitreous chalcogenide films
Kolobov, A.V. 1027

Photodissolution of metals in chalcogenide glasses: a unified mechanism
Elliott, S.R. 1031

The influence of the composition of the layers and of the inorganic solvents on photoinduced dissolution of As–S amorphous thin films
Vlček, M., M. Frumar, M. Kubový and B. Nevšímalová 1035

Electrical properties of silver-doped As–S glasses
Hajto, E., R. Belford, P.J.S. Ewen and A.E. Owen 1039

Potential p-type doping in amorphous chalcogenide films
Hautala, J., B. Moosman and P.C. Taylor 1043

Possible atomic diffusion of Cu in glassy Cu–As–Se
Saleh, Z.M., G.A. Williams and P.C. Taylor 1047

Section 21. Interface phenomena

Transient photocapacitance and capacitance studies of interface and bulk states in metal/a-$SiN_{1.6}$:H/a-Si:H/c-Si devices
Godet, C., J. Kanicki and A. Gelatos 1051

Kinetics of formation of silicides in a-Si:H/Pd interfaces monitored by in situ ellipsometry and Kelvin probe techniques
Roca i Cabarrocas, P., M. Stchakovsky, B. Drevillon, F. Fortuna and H. Bernas 1055

Effective electron affinities in doped a-Si:H and μc-Si films as determined from studies of MOS capacitors
Lee, D.R., C.H. Bjorkman and G. Lucovsky 1059

Phase transformation in the Cr/a-Si system during low temperature annealing
Edelman, F., C. Cytermann, R. Brener, M. Eizenberg, R. Weil and W. Beyer 1063

Electronically induced modifications of a-Si:H(P) films by scanning tunneling microscopy
Hartmann, E., M. Enachescu, F. Koch, G. Krötz, G. Müller and R.J. Behm 1067

Interface properties of a-Si:H/Si_3N_{4+x} and a-Si:H/SiO_2 elucidated by PLAS and its improvement by the atomic hydrogen
Nitta, S., H. Miyazima, M. Mukai, S. Nonomura, S.Q. Gu and P.C. Taylor 1071

The mobility edge lineup of amorphous silicon and silicon–germanium alloys heterojunction
Wu, Z.Y., J.M. Siefert and B. Equer 1075

Hydrogen effects on a-SiO_2: a photoemission study
Fanfoni, M., A. Pecora, G. Fortunato, L. Mariucci, S. Priori and C. Quaresima 1079

Role of surface states in the stress sharing dynamics of laser produced μ-c/a-Si:H composite films
Mavi, H.S., K.P. Jain, A.K. Shukla, S.C. Abbi and R. Beserman 1083

The influence of substrates on the Au/Si interaction
Pasa, A.A., H.R. Paes Jr. and W. Losch 1087

Photoemission study on the SnO_2/P a-SiC_x:H interface
Liao, X., G. Kong, Y.X. Wang, H.D. Zheng and Q. Zhang 1091

Section 22. Multilayers

Anomalous reflectance in random amorphous multilayers a-Si:H/$Si_{1-x}N_x$ and classical localization of light?
Nitta, S., S. Takeuchi, K. Ogawa, T. Furukawa, T. Itoh and S. Nonomura 1095

On the blue-shift of the optical bandgap of a-Si:H/a-SiN_x:H multilayer structures
Beaudoin, M., C.J. Arsenault and M. Meunier 1099

The optical bandgap of multilayers of a-Si:H and alloys: a comparison of experiment and thin-film optics calculations
Bernhard, N., H. Dittrich and G.H. Bauer 1103

Individual electronic defect states in a-Si:H/a-SiN_x:H double barrier structures
Teuschler, T., M. Hundhausen and L. Ley 1107

Electronic transport through a-Si:H/a-SiN_x:H single and double barrier structures
Arsenault, C.J., M. Meunier, M. Beaudoin and B. Movaghar 1111

Quantized structure in the photoinduced absorption spectra of band-edge modulated a-$Si_{1-x}N_x$:H films
Li, Y., M. Kondo, M. Yamaguchi and K. Morigaki 1115

Optical and electrical properties of a-Si_3N_4:H/a-Si:H superlattices prepared by plasma-enhanced nitridation technique
Miyazaki, S., K. Yamada and M. Hirose 1119

Phonon interaction in the photoluminescence of a-Si:H/a-Si_3N_4:H multilayers
Murayama, K., H. Hiramoto, S. Miyazaki and M. Hirose 1123

Continuous production of a-Si:H/a-SiN:H superlattice by pulsed plasma and photo CVD
Koinuma, H., A. Takano and M. Sumiya 1127

The built-in fields and interfacial properties of a-Si:H/a-SiN$_x$:H multilayers studied by electroabsorption spectroscopy
Liu Xiangna, Zhao Zhouyin, Wang Ying and Li Wenkai 1131

The nature of interface defects in a-Si:H/a-Si$_{1-x}$N$_x$:H multilayers
Yamaguchi, M. and K. Morigaki 1135

The hydrogen confinement and pipe diffusion on a-Si:H/a-Si$_3$N$_4$:H multilayer
Nonomura, S., M. Ohta, H. Suzuki, T. Muraki, S. Kusakabe and S. Nitta 1139

Asymmetric degradation of electron and hole $\mu\tau$-products in a-Si:H/a-SiC:H multilayers under illumination
Wang, F., T. Muschik, T. Fischer, M. Bollu, J. Kolodzey and R. Schwarz 1143

Drift mobility under in-plane conduction in hydrogenated amorphous silicon nipi multilayers
Oheda, H. 1147

Electrical and electrophotographic properties of CdSe/SeTe and CdSe/Se multilayers
Ionov, R., D. Nesheva and D. Arsova 1151

Section 23. Solar cells

Process technology for a-Si/a-Si double stacked tandem solar cells with stabilized 10% efficiency
Sakai, H. and Y. Ichikawa 1155

Amorphous silicon double stacked solar cell using low band gap a-Si bottom cell
Kim, T.G., S.C. Kim, J.M. Jun, K.C. Park, S.-O. Koh, M.-K. Han and J. Jang 1161

Optical absorption, light trapping and power dissipation in a-Si:H solar cells analyzed by photothermal deflection spectroscopy
Leblanc, F., J. Perrin and E. Cornil 1165

Sub-bandgap absorption in a-Si:H pin cells illuminated with infrared light
Rübel, H., W. Frammelsberger, P. Lechner and N. Kniffler 1169

The mobility–lifetime product in depleted a-Si:H diodes
Könenkamp, R., S. Muramatsu, S. Matsubara and T. Shimada 1173

Determination of transport parameters in a-Si:H junction regions
Könenkamp, R. 1177

Temperature dependence of the photocurrent in pin and nip solar cell structures made from a-Si:H
Hoheisel, M., E. Reichle, H. Harms and J. Kotschy 1181

Kinetics of light induced degradation in a-Si:H solar cells
Chen, L.-f. and L. Yang 1185

Thickness dependence of light induced degradation in a-Si:H solar cells
Yang, L. and L.-f. Chen 1189

On the bias dependent spectral characteristics of a-Si:H solar cells
Bruns, J., S. Gall and H.G. Wagemann 1193

Modeling of multilayer amorphous thin film Si$_x$Ge$_{1-x}$ single and tandem solar cells
Block, M., D. Bonnet and F. Zetzsche 1197

Trace of an interface layer between buffer and i-layer in the spectral response of a-SiC:H/a-Si:H solar cells
Kopetzky, W.J., H. Pfleiderer and R. Schwarz 1201

Surface recombination in a-Si solar cells
Pfleiderer, H. 1205

Section 24. Thin film transistors

A comparison of amorphous and poly crystalline TFTs for LC displays
Thompson, M.J. 1209

Instability mechanisms in amorphous silicon thin film transistors and the role of the defect pool
Powell, M.J., C. van Berkel and S.C. Deane 1215

TCS study of n- and p-channel amorphous silicon thin-film transistors
Nickel, N., W. Fuhs and H. Mell 1221

Short-channel effects in 0.2 μm channel length a-Si:H thin-film transistors fabricated by electron beam lithography
Fortunato, G., M. Gentili, L. Luciani, L. Mariucci, A. Mattacchini and A. Pecora 1225

Influence of traps on the characteristics of thin film transistors
Hack, M.G., A.G. Lewis and J.G. Shaw 1229

Density-of-states and transient simulations of amorphous-silicon devices
Shaw, J.G., M.G. Hack, P.G. LeComber and M. Willums 1233

Study of amorphous silicon high voltage transistors using novel electron microscopy techniques
Marshall, J.M., A.R. Hepburn, M. Woodward and S. Usala 1237

Temperature dependent field effect in a-Si:H
Schauer, F., O. Zmeskal and O. Salyk 1241

Depression of the off-current by n/i buffer layer in a-Si TFT
Zou, X., Z. Xu, Z. Zhou, S. Zhang, B. Zhao, R. Liu, Q. Zhang, C. Wang, C. Chen and Y. Hamakawa 1245

A new type of surface Schottky gate a-Si:H static induction transistor
Lin, X., Q. Lin, C. Yue, D. Wang and Z. Chen 1249

Chemically sensitive hydrogenated amorphous silicon thin-film transistors
Pecora, A., G. Fortunato, L. Mariucci and A. Bearzotti 1253

Section 25. Memory devices, light emitting, and special diodes

Analogue memory effects in metal/a-Si:H/metal memory devices
Snell, A.J., P.G. LeComber, J. Hajto, M.J. Rose, A.E. Owen and I.S. Osborne 1257

Electroluminescence of a-SiC:H multilayer films
Chen, G., F. Zhang and S. Yan 1263

Infrared-induced photoconductivity and electroluminescence in forward-biased a-Si:H pin-diodes
Wind, J. and G. Müller 1267

An amorphous SiC thin film visible light-emitting diode with a μc-SiC:H electron injector
Futagi, T., N. Ohtani, M. Katsuno, K. Kawamura, Y. Ohta, H. Mimura and K. Kitamura 1271

Improvement of blue-light emission in amorphous carbon based electroluminescent device
Shimizu, H., M. Yoshimi, K. Hattori, H. Okamoto and Y. Hamakawa 1275

Two-way photocurrent-multiplication in amorphous silicon carbide cells
Nakayama, Y., T. Yajima, H.-o. Ueda, S. Akita and T. Kawamura 1279

Observation of tunneling assisted photocurrent multiplication in a-SiN/a-Si heterojunction
Yoshimi, M., T. Ishiko, K. Hattori, H. Okamoto and Y. Hamakawa 1283

High stability metal/a-$SiN_{0.5}$:H/metal diode for LCD application
Yoshida, K., H. Uchida, E. Mizobata, H. Hirai and S. Kaneko 1287

Section 26. Radiation detectors and optical sensors

Amorphous silicon based radiation detectors
Perez-Mendez, V., G. Cho, J. Drewery, T. Jing, S.N. Kaplan, S. Qureshi, D. Wildermuth, I. Fujieda and R.A. Street 1291

High resolution optical recording on a-Si films
Gotchiyaev, V.Z., V.P. Korolkov, A.P. Sokolov and V.P. Chernukhin 1297

Transient recovery of a-Si:H p–i–n photodiodes
Barbier, P.R. and G. Moddel 1301

Study of the response speed of a high gain a-SiC/a-Si junction photosensor and the spectral response under bias light
Yamaguchi, M., M. Kondo, K. Hayashi, H. Nishio and Y. Tawada 1305

Transient currents in a-Si:H diodes
Wieczorek, H. 1309

Intrinsic type a-SiC:H hole-blocking layer effects on image lag in an amorphous silicon image sensor
Iida, Y., H. Nozaki, K. Yano and A. Furukawa 1313

a-Si:H photoconversion layer thermal degradation for a two level image sensor
Miyagawa, R., T. Yamaguchi and A. Furukawa 1317

Two operation modes of 2D a-Si sensor arrays for radiation imaging
Fujieda, I., S. Nelson, P. Nylén, R.A. Street and R.L. Weisfield 1321

Use of n–i–p–i–n a-Si:H structure for bistable optically addressed spatial light modulator
Chevrier, J.B., P. Cambon, R.C. Chittick and B. Equer 1325

Section 27. Application of chalcogenides

Photoinduced discharge characteristics of xerographic photoreceptors: theory and experiment
Kasap, S.O., V. Aiyah, B. Polischuk, Z. Liang and A. Bekirov 1329

Application of chalcogenide glasses in integrated and diffractive optics
Zakery, A., P.J.S. Ewen, C.W. Slinger, A. Zekak and A.E. Owen 1333

X-ray sensitivity of halogenated a-Se:As photoreceptors for electroradiography
Aiyah, V., A. Baillie, B. Polischuk, A. Bekirov and S.O. Kasap 1337

PASS – a chalcogenide-based lithography scheme for I.C. fabrication
Kozicki, M.N., S.W. Hsia, A.E. Owen and P.J.S. Ewen 1341

Author index Parts I and II 1345

Subject index Parts I and II 1365

MK
